... for all of your
Technology and
Virtualization
needs.

Local and Wide Area Network Experts

Area Networks, Inc. is a full service Managed Service and Solutions Provider, specializing in virtualization, and local and wide area networking solutions. We manage complex services and servers, 24 hours a day, 7 days a week, and utilize the latest technologies from VMware, Microsoft, Hewlett-Packard, and Cisco.

We can virtualize your servers, and reduce your power costs

Our professional staff can manage:

- Virtualization for Server Consolidation
- Virtualization for Disaster Avoidance
- Email Security & Archiving
- Internet Security & FireWall
- Backup & Disaster Recovery
- Installations & Upgrades
- System Performance Tuning
- LAN & WAN Networking Services

Integrated Technical Solutions

In addition to being a corporate Managed Service and Solutions Provider, Area Networks provides solutions to many of today's technical problems with hardware and software. After identifying your requirements, our experienced staff will design and engineer a practical solution to your problem, and offer an implementation tailored to your specific needs. We can also provide high performance Clustering and Server Fail-Over.

We can design an application around your business model.

Staff Augmentation Specialists

Area Networks also specializes in staff augmentation. We can assist you in finding permanent and temporary information technology specialists to work in your organization. We have successfully placed:

- Virtualization Specialists
- System Engineers
- Network Engineers
- Help Desk Technicians
- Application Developers
- .NET Developers
